

# Planning your final project

1. Brainstorm

2. Create a user story

3. Create a graphic design

4. Create Gitproject / trello / kanban

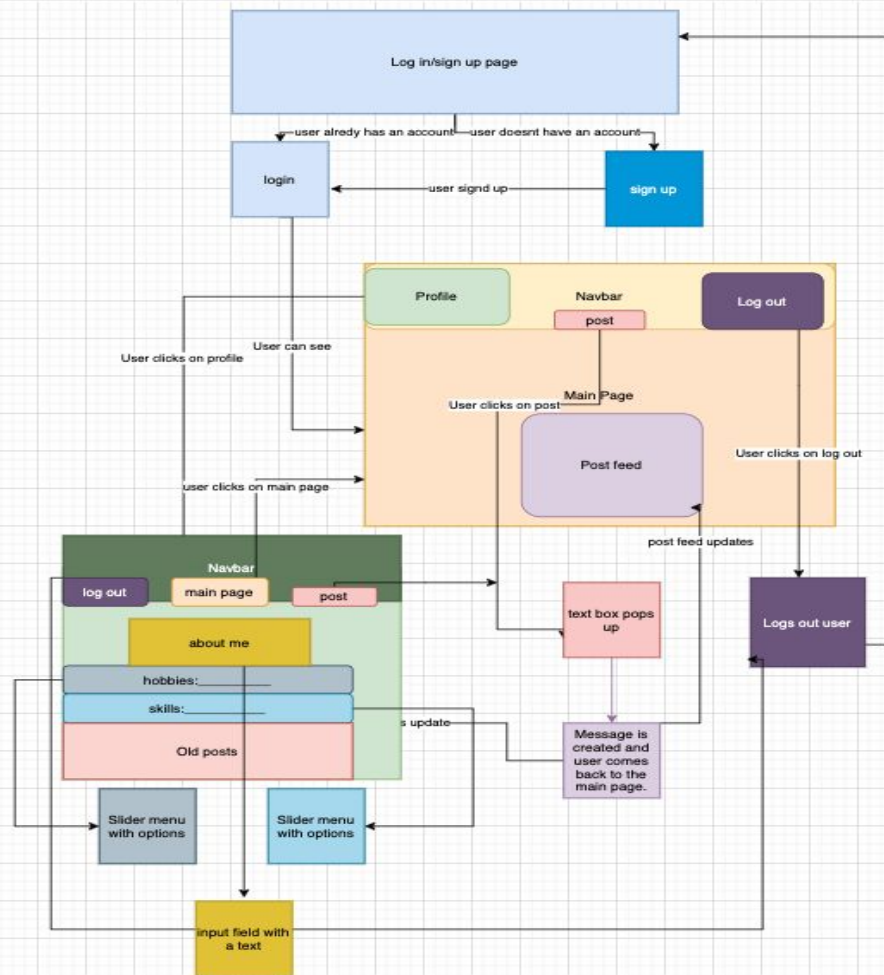

# 1. Brainstorm

1. Bounce ideas

2. Decide what is the ultimate goal of the project

3. Write down the nouns and verbs you feel will be associated with your project

# Design:

- Takes practise
- Not as easy as it seems
- Acquired skill
- We are used to high standard of pages out there
- Unavoidable to certain extent
- Worth having a deeper dive it

# Working on a project

- fixing mistakes as well as writing code
  - last parts take the longest
- hide the things that didn't go well and highlight the ones that did
- sometimes things go wrong and it is  
ok

Looks like a merge conflict there

 **Pui Yan LEUNG** 10:22 AM  
Yes, the conflict have been resolved

 **Felicia Valentine** 10:23 AM  
it WORKS 🏃

 **NMunro CN** 10:24 AM  
nice!
