## **React Calculator Brief**

This challenge is designed to test your react skills in making components, mapping data out, managing your state and receiving user input. It is important to note that this is a not a maths test and you will not need to create the maths logic for a calculator! We will be using a library to facilitate that.

Visually you can design this calculator however you like! Go crazy!! The image above might provide you with some inspiration as well  $\ensuremath{\mathbb{\mat$ 

## **Requirements:**

A basic calculator with the following buttons:

- Plus, Minus, Times, Divide and Equals Buttons
- Clear Button
- 0-9 Number buttons

Instead of trying to make your own calculator logic see the Eval function provided by the Mathjs library: <u>Mathjs Eval Function</u>.
